

## Accessory Glossary

### *The What and How of Accessories*

- Handbags - Wondering what you do with your lipstick, compact and/or perfume? Try a petite clutch style bag to match the fabric of your gown. You can keep it at the bridal table ready for when you visit the ladies room.
- Choker - Is said to be the most classical and versatile piece of jewellery you can own. The beauty of the choker is that it goes with most necklines.
- Earrings really do complete a look. Try on various styles to see which looks best with your wedding day hairstyle.
- Hair Clips & Accessories - Jewel encrusted hair clips and pins placed throughout your hair add sparkle and dazzle. Be mindful of your other accessories as not to over do the dazzle!
- Garter - If you follow traditions the garter is the most popular “something blue item”.
- Gloves - Depend on the formality of your wedding. Long gloves for a formal wedding, while short gloves for a less formal wedding would be suitable if at all.
- Tiara/Headpiece - If the Princess look is what you are after, then go no further than the tiara as your bridal accessory. Try on many to get one that sits comfortably on your head.
- Shawl - Ideal for the cooler months, keeps you warm as well as adding a touch of interest to your dress.
- Hair Piece - Adds length, volume and a touch of glamour.
- Shoes - Closed in or strappy? Plain or jewel encrusted? Platform or Stiletto? The most important thing, make sure they are comfortable.
- Hats are traditionally worn by the mother of the Bride/Groom. Can be worn by the bride if you are going for a period look.
